The APG® POS-Podium™ elevated point of sale integration solutions neutralize many of the problems associated with the traditional placement of point of sale peripherals at a check out lane.

APG utilizes a patented platform stabilization technique along with an innovative cash drawer design and molded peripheral supports to create these sturdy, low profile organization solutions.

- Reduces Ergonomic Issues
- Improves Security
- Boosts Check Out Throughput
- Enhances Customer to Clerk Contact
- Provides Cable Management
- Frees additional floor space

We would love to design a POS-Podium™ solution to meet your specific application requirements, so contact us today.
