Epson

Perfection® V30

Scanner with Check Imaging

Now small business customers have a versatile solution that combines the cost-saving benefits of RDC with the flexibility of color flatbed scanning.

Epson's Perfection V30 scanner is the first flatbed scanner to combine high-resolution color document scanning with SureCapture™ software for Remote Deposit Capture.

- Scan, copy, create PDFs, email and image checks in a single device
- Easy-to-use check-imaging software only from Epson
- SureCapture check imaging software scans and formats checks to meet RDC requirements
- Scans at 4800 x 9600 dpi optical resolution for exceptional clarity
- Includes photo editing and creative software
- ReadyScan™ LED provides fast scans with no warmup time
- Earth-friendly LED ensures low power usage with no mercury

Versatile and cost-effective scanning solutions

Epson's Perfection V30 flatbed scanner brings a new level of versatility and ease-of-use to small businesses who accept up to ten checks per day. In a single low-cost device, users can automatically scan, copy, create PDFs and email documents and photos, plus capture check images for their Remote Deposit Capture (RDC) application.

Easy-to-use image-handling software for RDC

Now you can deposit checks anytime with Epson's Perfection V30 with check imaging capabilities. Using Epson's SureCapture check imaging software, you can capture up to three checks at a time. Just put the checks in a special sleeve and hit scan. The software automatically images, crops, aligns and matches both sides of the check, reads the MICR and sends the data to your RDC provider in their required format. It's that easy. And you won't have to buy an expensive standalone check scanner to get all the advantages of RDC.

Wide range of scanning features

In addition to check scanning, the Perfection V30 offers top quality, one-touch scanning for documents and photos at 4800 dpi. And it delivers a host of other features including one touch scanning, a high-rise, 180-degree lid for scanning books and 3D objects, as well as photo editing and creative software. Best of all, the Perfection V30 scanner has been certified by Energy Star and features earth-friendly LED technology that ensures low power consumption with no mercury.

Epson quality and reliability

The Perfection V30 flatbed scanner delivers the outstanding quality and reliability that Epson is known for and, with its easy setup and one-touch scanning, customers can be up and running in no time. In addition, the Perfection V30 scanner is backed by Epson's industry-leading service and support programs and includes a one-year limited warranty.
